

44 Things I Wish I Knew Before I Started Blogging - The Cheat Sheet

This is a cheat sheet created to go alongside our post titled "44 Things I Wish I Knew Before I Started My First Blog"

[See it at https://www.codeinwp.com/blog/starting-a-blog/](https://www.codeinwp.com/blog/starting-a-blog/)

The numbers correspond **and link to** each individual section in the post.

Written by Bill Widmer, Colin Newcomer, and Karol K for the CodeinWP blog.

On traffic and SEO

- [1](#) Use SEO to drive tens of thousands of visitors every month.
- [2](#) Build links to boost your rankings.
- [4](#) Use internal linking to help Google (and people) navigate your site.
- [5](#) Guest blog for more traffic, better SEO, and brand awareness.
- [26](#) Use your competitors' rankings as easy sources for juicy keywords.
- [31](#) Limit how much time you spend looking at analytics so that you don't waste valuable time.
- [39](#) Do keyword research for each and every new post you publish.

On building a community and keeping readers happy

- [13](#) Build an email list from the start, and don't forget to send them stuff.
- [28](#) Add a FAQ or other instructions to cut down on repetitive emails via your contact form.
- [30](#) Don't be put off if you get negative comments on your content - it happens to literally everyone.
- [33](#) Do regular content audits to make sure that your website offers only on-point advice and no filler content at all.
- [34](#) Update your content regularly - this will make sure that not only your regular visitors but also people coming from Google will benefit from your content.

On writing and creating a voice

- [8](#) Format your blog post to make you look like an expert.
- [14](#) Stick to a theme for better SEO and a stronger follower base.
- [15](#) Use your audience to choose topics.
- [20](#) Focus more on creating an actual brand and voice than trying to please every person in the universe.
- [21](#) Write intros that connect with regular people, not high school English professors.
- [27](#) Your headline is what convinces readers to look at your post - make it count.
- [38](#) Use Quora to really find out what people want to read and learn about.
- [40](#) Get inspiration from seemingly unrelated niches - read fiction, keep a journal, explore the world.
- [42](#) Stop obsessing over grammar. Nobody cares.
- [43](#) Writing, editing, publishing - it's a 3-step process. Don't do them all at the same time.
- [44](#) Get a good keyboard → Try out blogging apps → Experiment with helper apps.

On promotion

- [6](#) Use social media to drive thousands of converting traffic.
- [9](#) Use content upgrades for 785% more conversions.
- [11](#) Use influencer marketing to 10x your audience.
- [12](#) Always be networking. Always.
- [16](#) Share your content somewhere besides social media.
- [18](#) Leverage paid social media advertising for better reach.
- [24](#) Reshare old content on social media to reach new and existing followers.
- [41](#) Give your best stuff away for free - just like famous artists do on the radio.

On publishing content

- [3](#) Go for quality over quantity - publish just great content.
- [7](#) Create amazing images to increase shares, backlinks, and subscribers.
- [10](#) Add call to actions to get the most from your audience.
- [17](#) Give your "About" page some love.
- [19](#) Add videos to your blog posts to increase engagement.
- [22](#) Create an editorial calendar and plan your content out in advance.

On website health and maintenance

- [23](#) Stay on top of regular WordPress maintenance to keep your site secure and running well.
- [25](#) Don't assume that more features means a better WordPress theme and always choose themes from reputable developers.
- [29](#) Manually test important pages on your site regularly to make sure forms and payment pages are functioning properly.
- [32](#) Make sure that your website is hosted with a trusted company to avoid trouble further down the road.
- [35](#) Go easy on the number of plugins you have - if possible, focus only on getting something for: SEO, backups, caching, social media, contact forms.
- [36](#) Keep your site safe with one of the popular security plugins; options: Wordfence, Sucuri, iThemes Security.
- [37](#) Don't sweat over your Google PageSpeed Insights score - if you really want to improve it, get a faster host.
